School of Environment and Natural Resources

The Ohio State University

ORIGIN STORY:

- HIGH LEVELS OF STRESS IN OHIO AGRICULTURE IN 2018, 2019
 - Weather, Trade Wars, Suicides
- NO GOOD STATEWIDE DATA
- KEY QUESTIONS:
 - How are farmers doing?
 - What are biggest stressors?
 - How does this vary by farm type?

<https://www.cincinnati.com/story/news/2019/07/30/ohio-crops-2019-farmers-40-counties-can-apply-disaster-relief-after-tough-year/1864664001/>

2020 Ohio Farm Poll (OFP)

- Survey designed w/ stakeholder input
- FOCUS: 2019 stresses: weather, markets, health, etc.
 - Document overall situation
 - Explore differences by farm type, size, marketing approach, HH demographics
 - Capture attitudes on key issues
 - Capture baseline data on farm practices

2020 OHIO FARM POLL
Ohio Farmers
Speak

We know that last year was a difficult time for many Ohio farm families. We designed this survey to gather accurate information about how different types of farms are adapting to changing market, weather, and community conditions.

Our goal is to take the pulse of the farm community on a range of important issues. We will use the results to guide OSU research and extension programs in 2020 and beyond. We will also share results with policy makers to ensure their decisions are made based on the best information available on the state of agriculture in Ohio.

We thank you in advance for taking the time to answer these questions.

This survey is designed to be completed by someone who is familiar with your farm operation. You must be over 18 to fill out this survey.

Did you or other members of your household operate a farm in Ohio in 2019?
☐ NO → Please ✓ and return survey in envelope ☐ YES → Please continue

METHODS

THE OHIO FARM POLL

- Implemented February to May 2020
- Random samples
 - 2,500 statewide farm operators (DTN) – stratified by acreage
 - 500 certified organic farms (USDA)
- Modified Dillman Mail Survey (w/ online option)

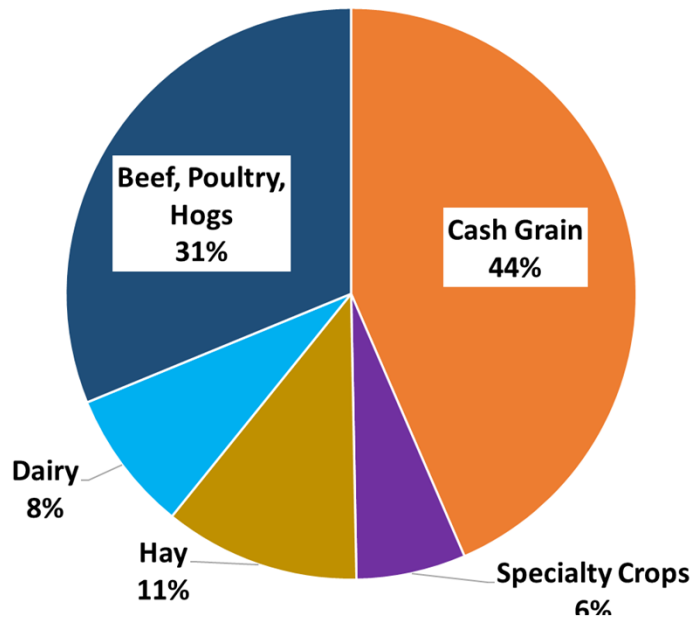

* = 487 disqualified – mostly from statewide random sample

1,112 responded
44% response rate

- 41% statewide (837)
- 56% organic (275)

Profile of 2020 OFP Respondents *(weighted statewide)*

Farms by Most Important Source of Income

Percent of Farms by Gross Farm Sales

How were Business Conditions on your Farm in 2019?

**2019 was a
tough year
for farm
businesses**

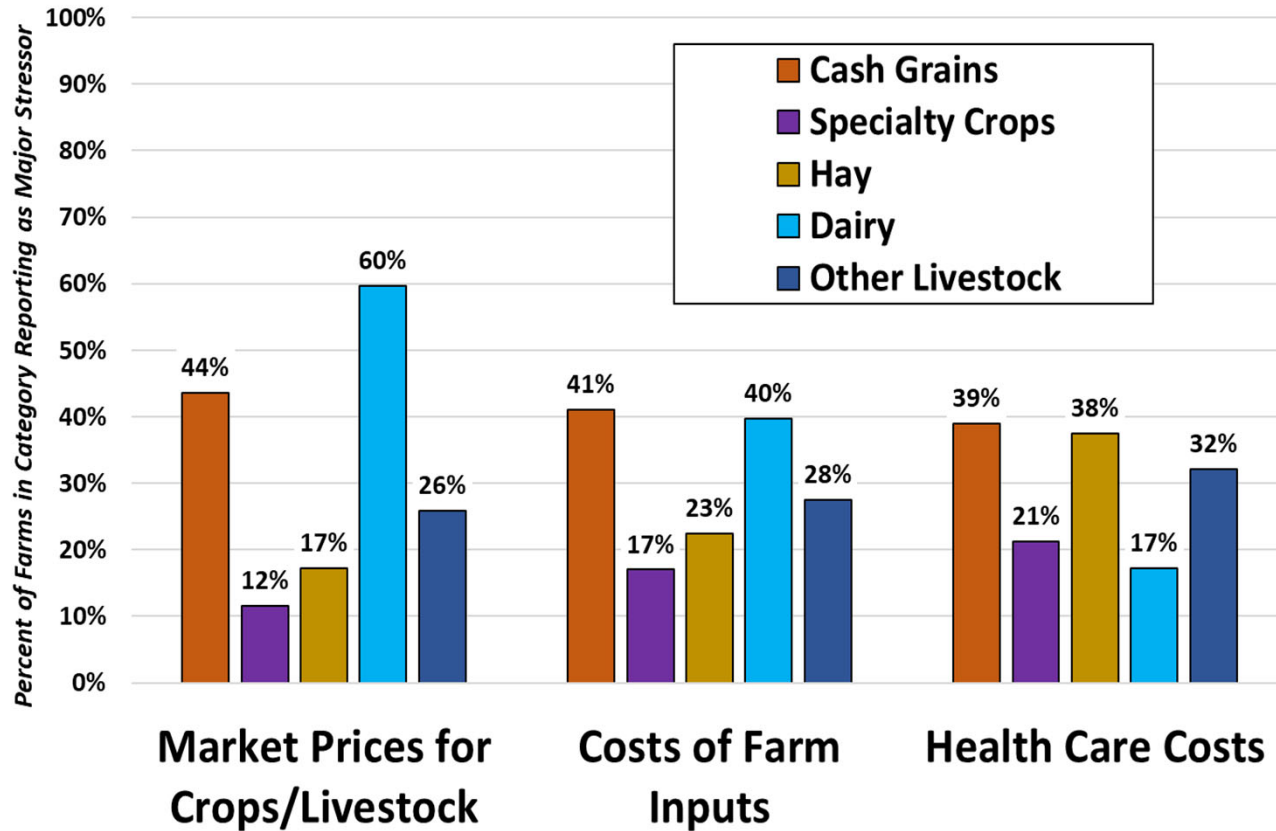

Major Sources of Stress in 2019

Top stressors

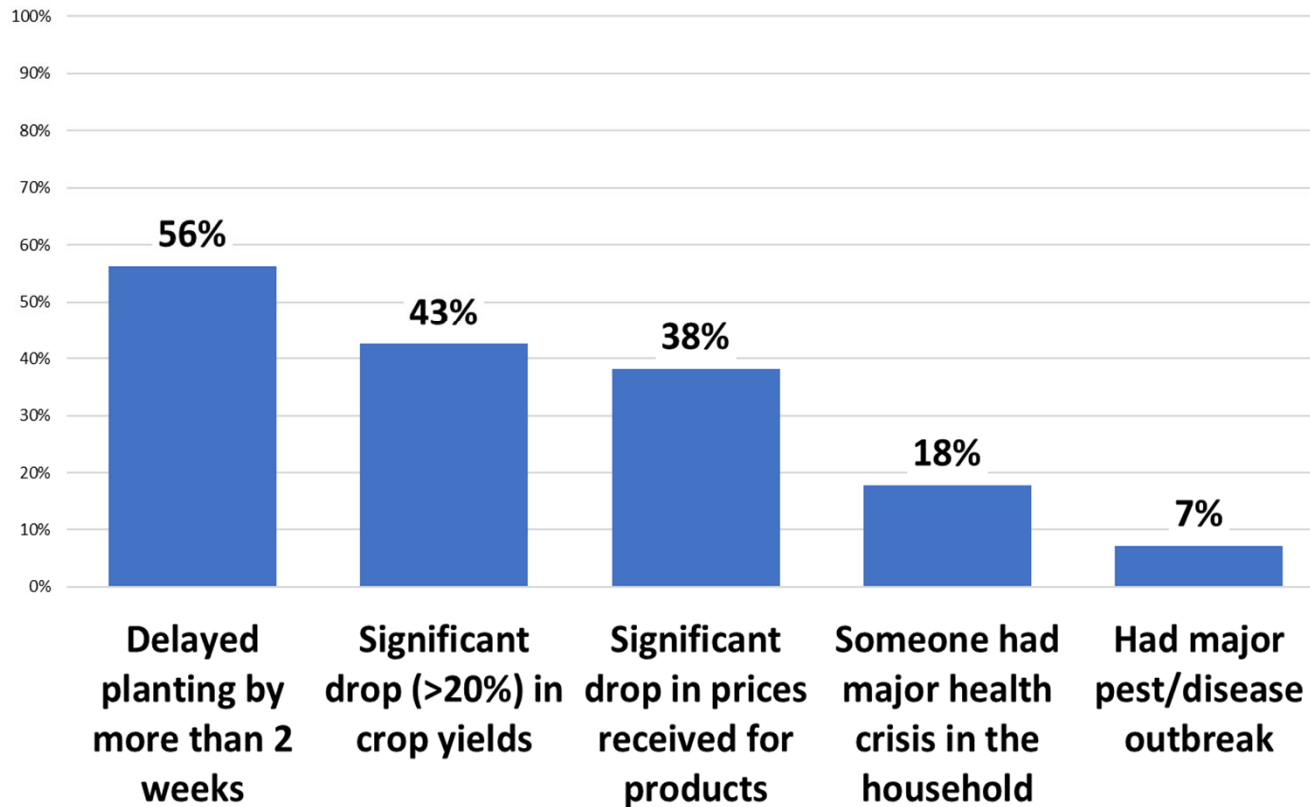

- Weather
- Poor farm economy
- Health care costs

Sources of Major Stress By Farm Type

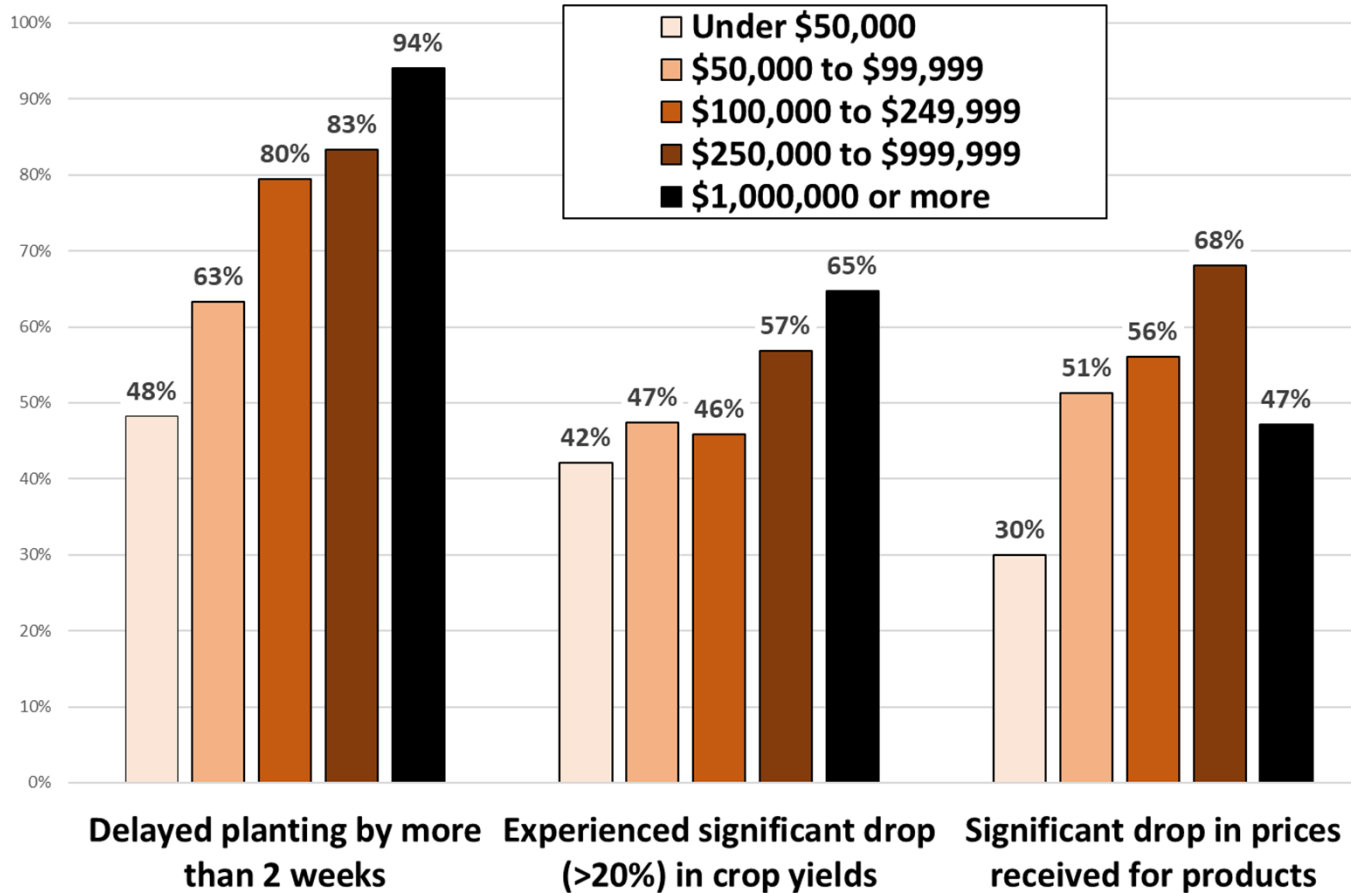

Sources of stress differ by farm type

Percent of Farms Experiencing Different Shocks in 2019

**Many Ohio farms
delayed planting,
had low yields, and
depressed prices**

Percent of Farms Who Experienced Shocks by Farm Sales Class

**Large farms
experienced
more shocks**

2023 Ohio Farm Poll Panel Survey

- **Motivation** – document impacts of COVID and other recent events on 2020 OFP respondents
- **Value** of Panel data
 - Track exit & viability
 - Link conditions at time 1 with outcomes at time 2
 - Update estimates of Ohio Farm Sector status / views / behaviors
 - *Caveat – some sampling bias (no new entrants; attrition)*

2023 Ohio Farm Poll Panel Survey

THE OHIO FARM POLL

Sampling: Resurvey of all 2020 OFP respondents (Spring 2023)

Instrument: Mail survey (modified Tailored Design Method)

789 responded
75% response rate
(64% filled out survey)

	N	% original sample	% of farms with known status
Original sample frame	1,112		
responded - still farming	706	63%	85%
responded - no longer farming	88	8%	10.6%
Not deliverable/no longer at address	38	3%	4.6%
Presumed exited	(126)		(15.2%)
not responded	263	25%	

Exit Rates by Farm Characteristics

FARM SIZE

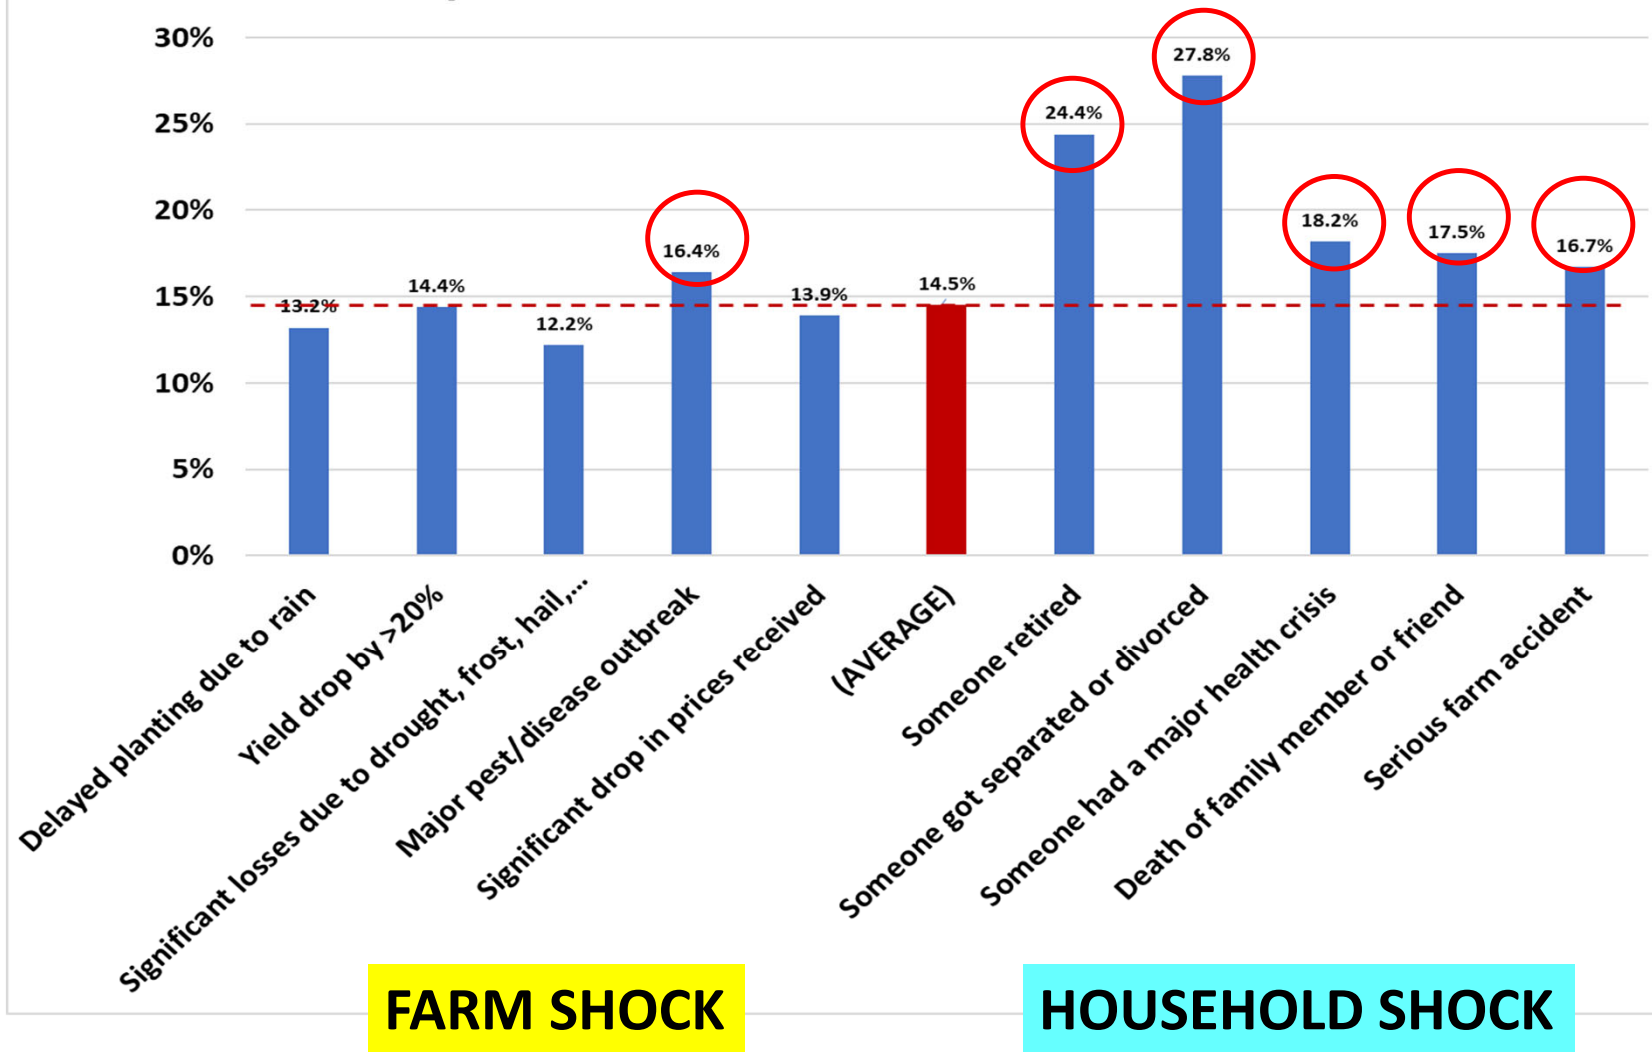

Exit By Marketing Approach

Exit by Farmer/HH Characteristics

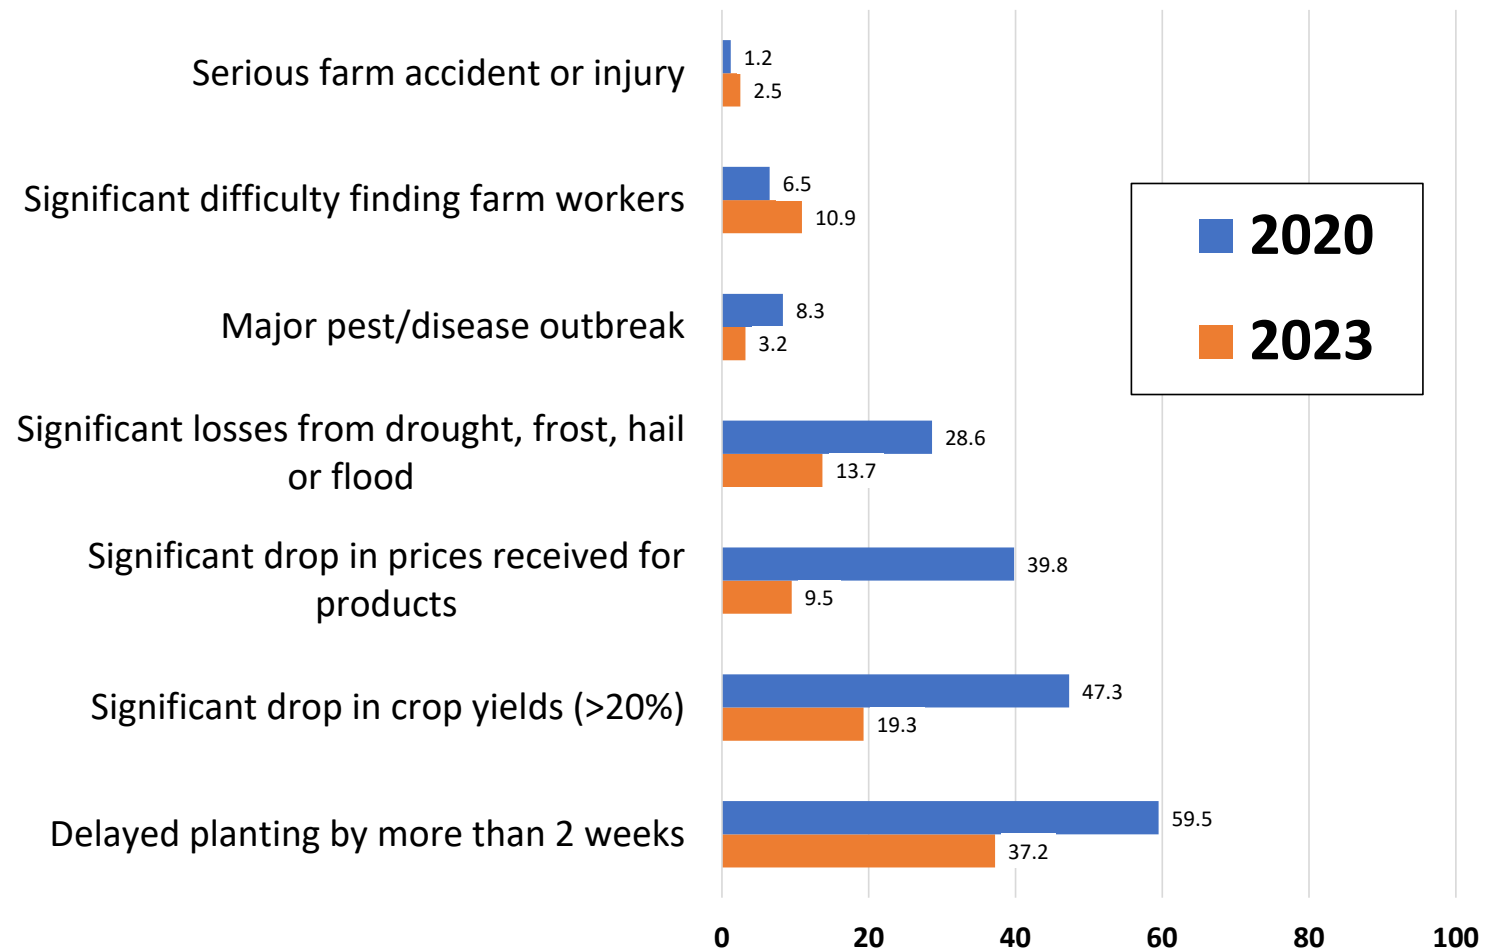

Experience of Shock over Last 2 Years

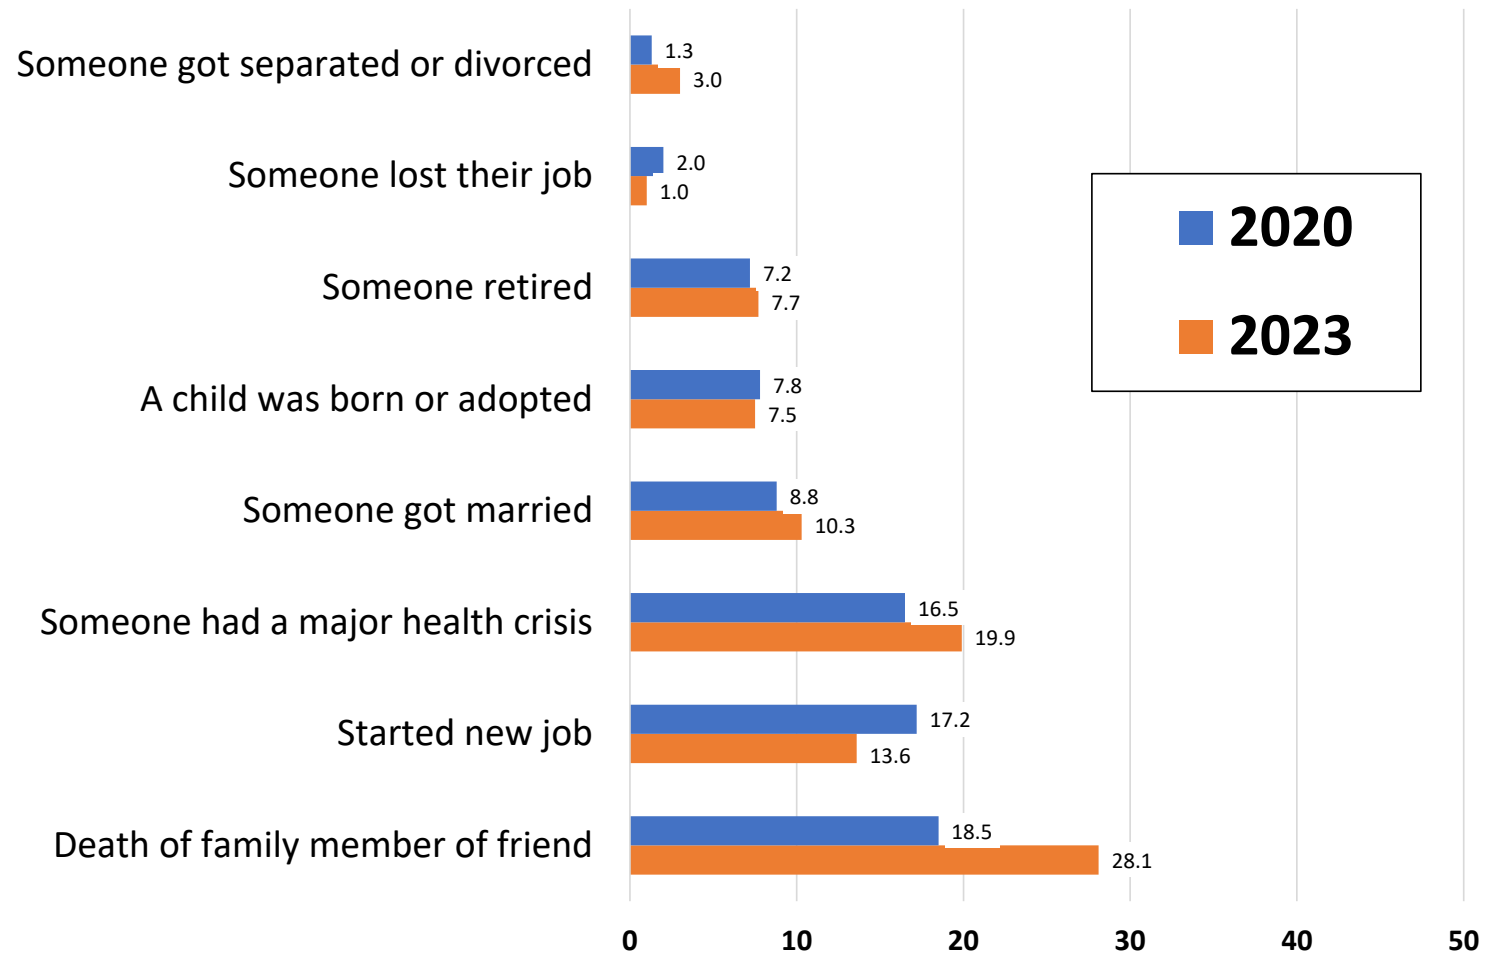

Comparing Responses in 2020 & 2023

(Panel Statewide Random Subset)

Percent Reporting Farm Shocks (last 2-3 years)

Percent Reporting Household Shocks

Comprehensive Stress Scale

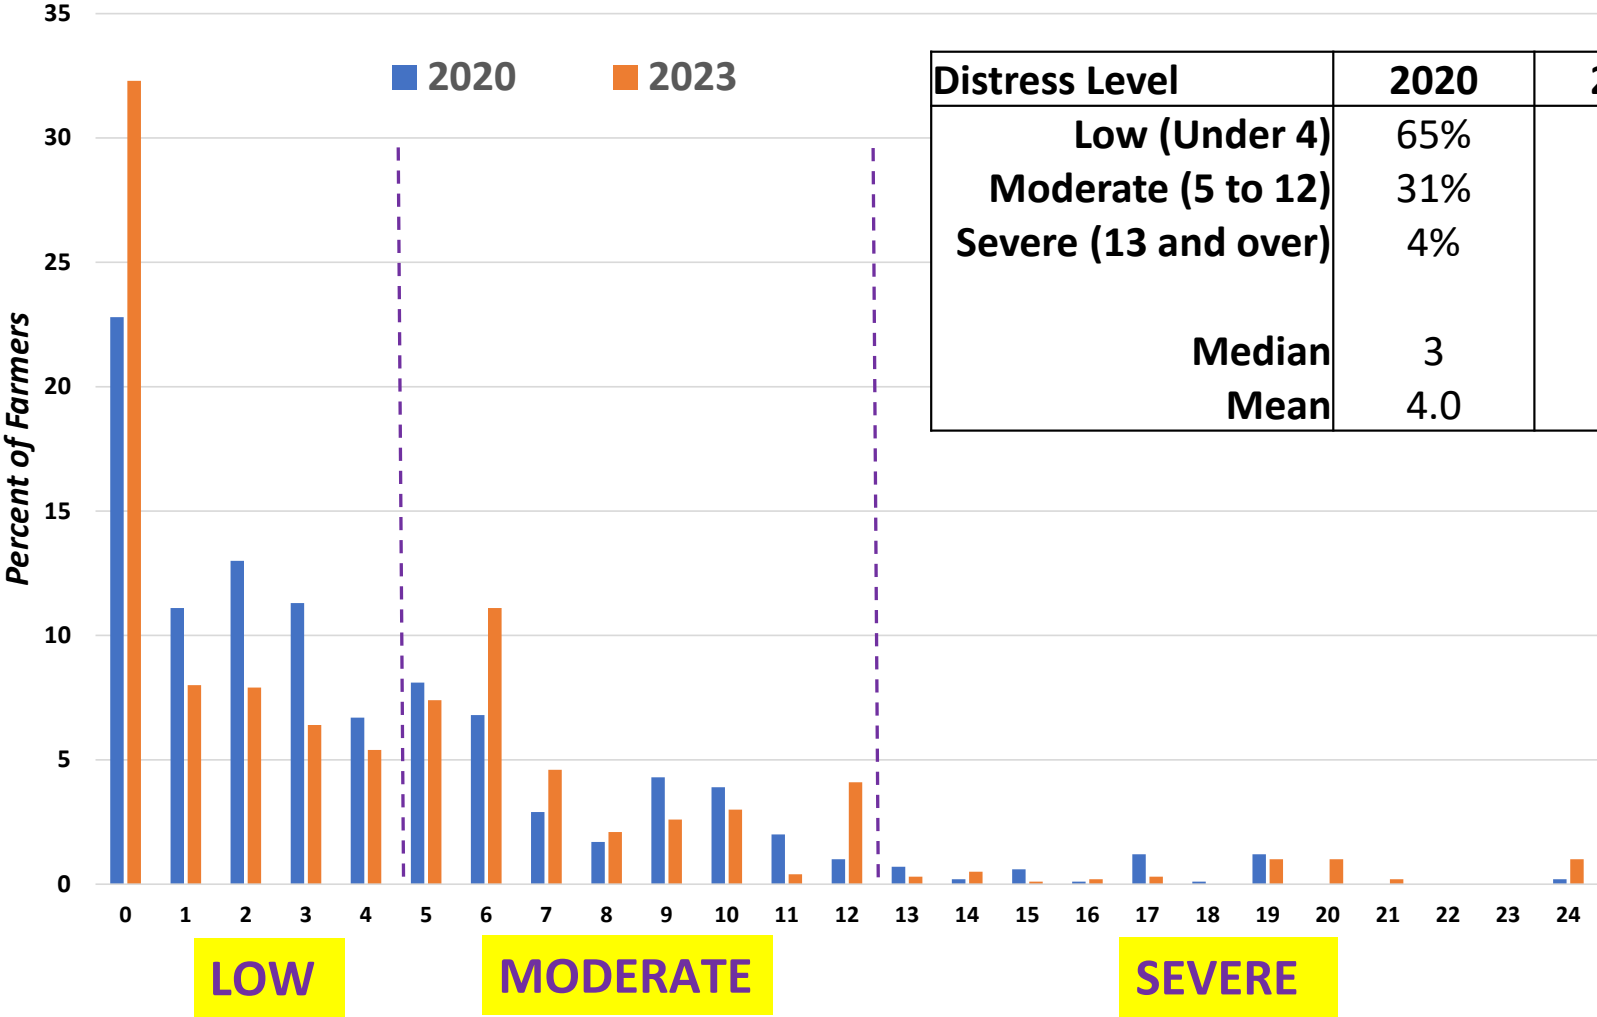

Comprehensive Stress Scale

	2020	2023
Median	22	21
Mean	22.8	21.5
Std.Dev.	11.48	13.37

K6 Psychological Distress Scale Scores

Thank you to the farmers who participated in the Ohio Farm Poll.
